How is WellVia able to provide a quality doctor visit at an affordable rate?

On average a doctor in a traditional office setting must charge \$125-\$150 to earn \$20-\$30. The difference between what's charged and what the doctors earn per visit goes toward paying the overhead costs associated with running a doctor's office such as rent, utilities, and administrative staff. WellVia uses technology and best business practices to eliminate these costs and pass the savings on to our customers.
